What is National Socialism?

By Matthew Heimbach

Excerpt from Europa The Last Battle by Tobias B.

Part 3 – Minute 23:21

A lot of people, of course, have seen History Channel documentaries and scare pieces on the mass media that give a distorted view of what National Socialism actually is.

First of all, National Socialism is an ideology about life. It's about the cultivation of life, of building strong families, of building families that are able to raise good children, children that are moral, children that are healthy, and children that are on a path of virtue to be able to build a better and brighter future for the nation.

It's about cooperation. Specifically, class cooperation, gender cooperation and cooperation throughout all members of society.

National Socialism views the nation like a body and a body takes all different parts. The liver is not more important than the brain or the heart or the arm or the leg. Everything works in tandem with one another to be able to be life.

We, as National Socialists, support every single member of our community as being part of an extended family.

The working class has a responsbility and a duty to be able to work hard, but they also have a right to economic justice, to having their voices be heard within society, and bosses have a right to be able to make profits within their corporations and companies, but they also need to ensure that they're putting the best interests of the workers, families and the nation first.

We believe in taking from the right nationalism, without capitalism, and from the left socialism, but not internationalism.

At the end of the day, National Socialism and its economic theory is about putting the nation first, because the nation is your family.

National Socialism is also about rejecting capitalism and communism. Capitalism and communism are two ideologies that take the human being and make him a cog within a greater machine.

Communism wages a war of the poor against the rich, and capitalism is a war of the rich against the poor. Both of these are Jewish ideologies, and ideologies that poison the national community. They tear apart the working class, they tear apart

families, and they turn the nation into one giant fire sale, to be able to say that whoever has the most money or the most power is able to loot intelligent.

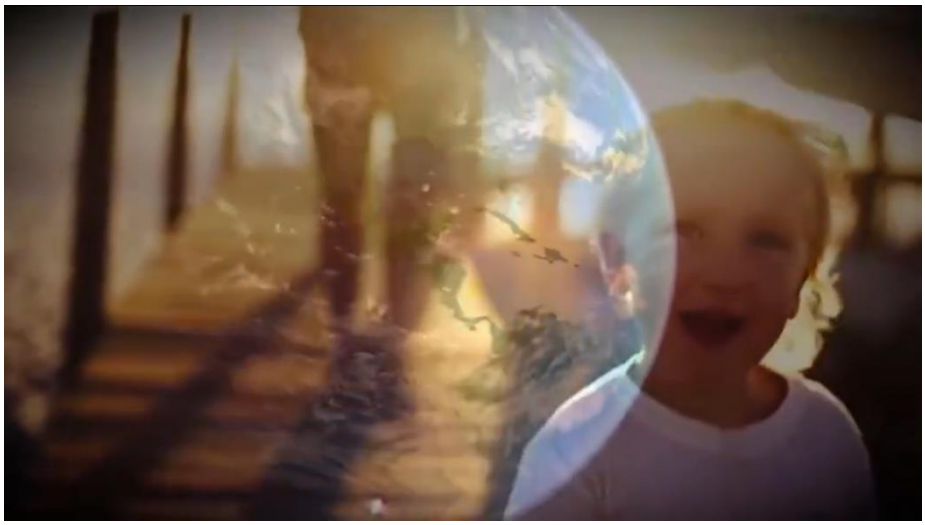
National Socialism says that the national community has to work together, that we need to ensure that everyone has rights and duties and responsibilities to one another, and this, in turn, creates a healthier society.

National Socialism believes in the cultivation of virtue. We reject the degeneracy that we see in the modern West, the pornography that we see on the television screens, the radical individualism within our society and, instead, say we want to be able to cultivate and activate within ourselves natural beauty.

We want to be able to build beautiful art. We want to be able to build beautiful cities and beautiful communities. This is about the cultivation of what is good and everything about capitalism and communism and the Jewish power structure is about destroying what is good.

NATIONALISM
ACKNOWLEDGES PEOPLE
ARE DIFFERENT, AND THAT
BOUNDARIES CREATE
GOOD NEIGHBORS.

We see this in the modern West, whether it's the importation of foreign peoples, foreign ideologies, radical feminism, abortion, and a culture that supports death instead of life. This is an ideology of death, a death cult that is destroying the Western peoples in the Western world.



We, as National Socialists, support an ideology of life, of rebirth and rebuilding ourselves and our nations.

We're an ideology that believes in peace throughout the entire world. General Leon Degrelle said that National Socialism and racialism is about lifting your own people up, and we want the same for every single group of people. We want every single ethnicity and ethnic community around the world to be able to be stronger, to be

able to chart their own destiny, and to be able to work together against the International Jew, work against the international capitalists, and work against a system that breaks apart nations and families.

Finally, National Socialism is an ideology that isn't an ideology. IT FOLLOWS NATURAL LAW. These are principles that are within all of us.

We, as National Socialists, whether we are Christians, or pagans, or simply agnostics, understand that there is a greater power and there's greater principles that drive us in this world.

As an extended family and a national community, we're not at war with one another over differences on religion, differences in subculture or differences in class. We understand that working together as a team is what will make our nation strong.

National Socialism is building a better and brighter future.

So you might get a lot of lies in the media, but what the truth is ... is we are the only ideology that can defeat the international Jew and the international capitalists not just in our nation, but in all nations, to bring about an Earth where we take care of the environment, we take care of animals, we take care of the water we drink and the air we breathe, and we take care of our blood, and our culture.

National Socialism makes you a steward. You have responsibilities and duties. It is not an ideology for the weak. It's an ideology for those that love their faith, their family, and their folk.

7 Principles of the National Socialist Doctrine

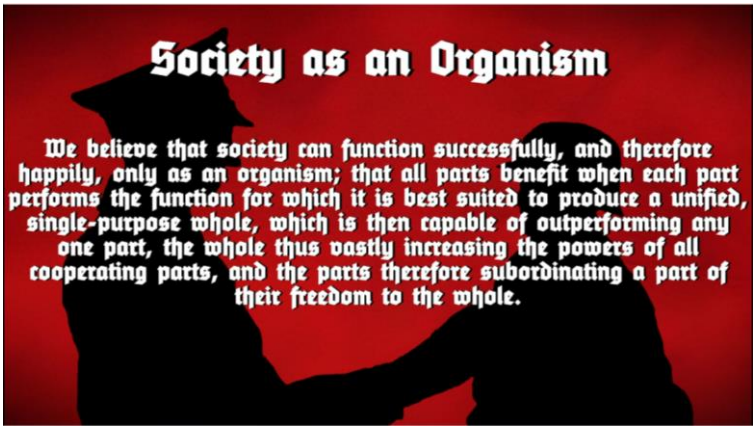
A video by Erwachen ('Awakening') on Odysee

To be a National Socialist, you must understand the National Socialist Worldview.
This can be defined by these 7 principles of our doctrine layed out to us by Rockwell.

(1) The Higher Goal of Life

We believe that an honest man can never be happy in a naked scramble for material gain and comfort without some goal which he believes to be greater than himself, and for which he is willing to sacrifice his own egoism. That goal, for us, is the upward struggle of our race and the fight for the common good of our peoples.

(2) Society as an Organism

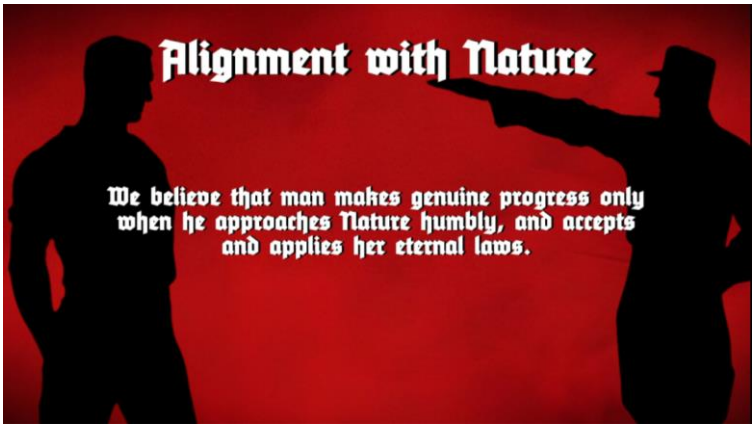


We believe that society can function successfully, and therefore happily, only as an organism; that all parts benefit when each part performs the function for which it

is best suited to produce an unified, single-purpose whole, which is then capable of outperforming any one part, the whole thus vastly increasing the powers of all cooperating parts, and the parts therefore subordinating a part of their freedom to the whole.

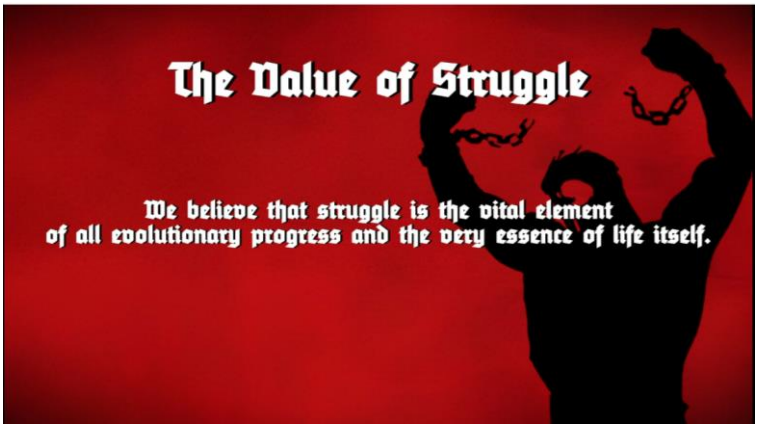
(3) Alignment With Nature

We believe that man makes genuine progress only when he approaches Nature humbly, and accepts and applies her eternal laws.



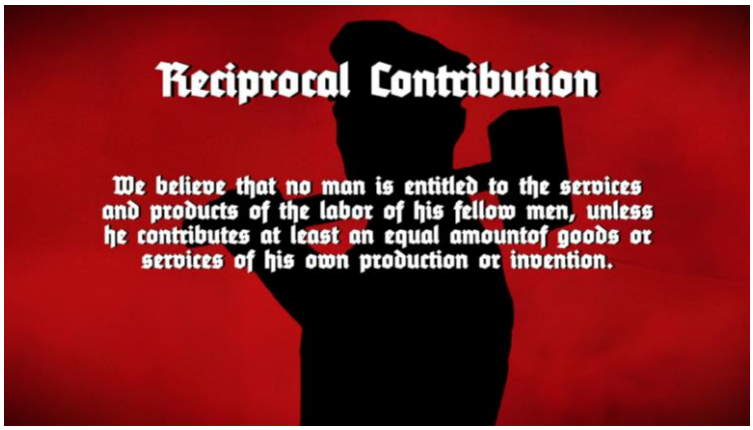
(4) The Value of Struggle

We believe that struggle is the vital element of all evolutionary progress and the very essence of life itself.



(5) Reciprocal Contribution

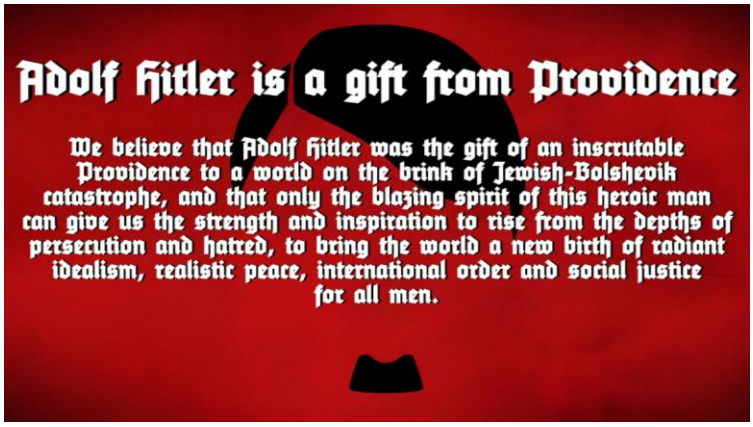
We believe that no man is entitled to the services and products of the labor of his fellow men, unless he contributes at least an equal amount of goods or services of his own production or invention.



(6) Maximizing Individual Potential

We believe that it is to the advantage of society to see that every honest man has the freedom and opportunity to achieve his maximum potential by preserving his health, protecting him from unforseeable and ruinous catastrophes, educating him to capacity in the areas of his abilities, and guarding him against economic and political exploitation.

(7) Adolf Hitler Is a Gift From Providence



We believe that Adolf Hitler was the gift of an inscrutable Providence to a world on the brink of Jewish-Bolshevik catastrophe, and that only the blazing spirit of

this heroic man can give us the strength and inspiration to rise from the depths of persecution and hatred, to bring the world a new birth of radiant idealism, realistic peace, international order and social justice for all men.

National Socialism Is the Only Way – Take It from Rockwell.

The word 'swastika' comes from Sanskrit: स्वस्तिक, romanized: svastika, meaning **'conducive to well-being'**.
It is used as a **symbol of divinity and spirituality** in Indian religions, including Hinduism, Buddhism, and Jainism.

The Cult of the North Star

> The Big Dipper (*Ursa Major*), in its convolution around the North Star, forms a swastika. This symbol, which is present in the cult of Apollo, is represented in many Eurasian religions. Traditionally, the North Star is the seat of Thule, the name of the celestial paradise. It is the celestial city of divine beings. For the emanation of such beings to incarnate on Earth to help humanity, children must be conceived according to the female priestly tradition. The *tholos*, a form of sacred maternity ward, was intended to welcome pure souls from the celestial Thule.

Matronyms of the Wives of Clotaire I

> The Old Norse *reiða* is a shortened form of *reiðartýr* or *reithratýr*, which is a nickname for Odin meaning 'god of the chariot.' This is the sacred celestial chariot that revolves around the North Star symbolized by the swastika that rotates at the pole.
